www.k-laserusa.com

Patient: Gus, Thoroughbred Rescue

Problem:

- Sore back
- Pain upon examination/palpation

Previous Therapies:

- None

K Laser Protocols:

Gus was not being saddled so treatments were performed from withers to SI. Each protocol was performed on left and right side of back. Gus relaxed (bottom image) during treatments.

- D3 – Equine Back
- D12 – Edema/Congestion

Treatment Frequency:

- 3 Days of treatments (every other day)

Additional Treatments:

- None

Outcomes:

- After one treatment, owner reported Gus rolled on back in paddock and galloped for the first time
- After 3 K laser treatments Gus was pain free but still had not been saddled

Prognosis:

- Excellent
