

## Cincinnati Bengals

We were introduced to the K-Laser midway last season and it immediately became an integral part of our treatment options with the Cincinnati Bengals. It made our low-level laser virtually obsolete and proved to be very helpful in returning our injured athletes to the field quickly. Its sleek design and fool-proof applications makes it easy for any health care professional to bring state of the art therapy into their office.”

**Paul B. Sparling, MEd, ATC, Head Athletic Trainer, Cincinnati Bengals**
