

Let Go Of Pain Now

By Dr. J. Rod McGinnis, DC

From the dull, nagging ache of tendonitis to the sharp, stabbing jolts from shoulder and back injuries. Pain can be devastating and rob you of your quality of life. It can go on for months—even years, while you try to ignore it, take pain medications or have treatments that don't work. In the mean time, you're losing sleep and missing out on your favorite activities.

To get rid of the pain, you need to get rid of the injury itself. But often, our cells don't have enough energy to complete the healing process. They get stuck in an inflammation cycle. There is a new IV Laser therapy that gets to the root of the injury and treats it right at the cellular level. While most medications temporarily mask the pain and inflammation, there is a treatment available which can stimulate, promote, and finish the healing process, resolve inflammation and help the body develop healthy new tissue rather than troublesome scar tissue.

The treatment is done with Klaser Class IV Laser. Not the type of laser that cuts or burns, but one that is gently absorbed by soft tissue. During the absorption process, cells are stimulated to produce more adenosine triphosphate—or ATP. This is the simple fuel that cells use to do what they're supposed to do—regenerate

and repair. Think of it like photosynthesis, plants absorb sunlight and convert it to energy that's used to grow and repair.

Decades of research and studies have prove how highly effective it is in repairing damage to soft tissue. From shoulder injuries to sciatica, tendonitis, plantar fasciitis, and sports injuries; lasers are now used to heal these injuries completely. Even arthritis and degenerative disc disease sufferers can see long term benefits

from this treatment without negative side effects many experience with long term use of medications.

This new Class IV laser has been used in Europe for decades, but in 2004, it was brought to the USA and FDA cleared for the use in musculoskeletal and joint problems. The results that the Doctors across the USA are achieving have been remarkable. It has exceeded the expectations of the Doctors trained in The Class IV laser therapy. There are currently about 600 Doctors across the USA

and Dr. McGinnis in Sacramento was one of the first 50 in California and the only one in the Sacramento area to utilize this new treating device.

Dr. J. Rod McGinnis, DC of Laser Therapy & Wellness Center has been active in natural health & wellness for 30 years. You can reach him at 916-929-8152. For more information visit www.lt4pain.com. His offices are located at 2020 Hurley Way, Suite 190, Sacramento, CA

Primary Care Anthroposophic Medicine

Raphael

medicine + therapies

The medical care you've always hoped for!

Fully-trained MD treats acute and chronic illness with non-toxic and conventional treatments

- + Healthcare for all ages
- + Physical exams and preventive care
- + Immune system support for cancer patients
- + Supporting human wholeness and individual destiny, based on an anthroposophic understanding of the human being
